

## INTRODUCTION

Industrius d.o.o. was founded in 2010 and has its seat in Bajagić near Sinj, Republic of Croatia. It is one of the leading companies in the area of industry and power engineering. In the seven years of existence the company has successfully completed numerous projects in the region as well as worldwide. The proof of successful business activity is visible through many references and rewards. With the aim of conquering new markets and increasing competitiveness, the Industrius d.o.o. company is continuously investing in the growth and development. So, in April 2017 a new production hall in the Podi Industrial Zone near Šibenik, Republic of Croatia, was opened.

## CERTIFICATES

- o EN ISO 9001
- o EN ISO 18001
- o EN ISO 3834-2
- o EN ISO 14001
- o EN ISO 1090 - IN PROGRESS
- o ASME - IN PROGRESS (Stamps: PP, S, R and U)

## BUSSINES ACTIVITIES

The focus of the business activity is on assemblies and installations in power, petrochemical and processing plants and continuous maintenance, inspection and, if necessary, repairs. The company is specialised in engineering and installation of high pressure, medium pressure and low pressure pipelines and their maintenance as well as construction and maintenance of power plants. The name Industrius d.o.o. refers, among other things, to the engineering activities which imply all steps from obtaining to the necessary documentation, delivery, import, assembly, inspections, to trial works and permanent maintenance of facilities. The company is specialized in welding of high specification materials and high quality classes of joints which are in the world's top welding performances. Industrius d.o.o. is an expert in TIG welding, which is manifested in the high quality of welded joints (lowest number of mistakes) as well as esthetic and mechanical properties of welds.

## EMPLOYEES

### Industrius d.o.o. consists of:

- Graduate mechanical engineers and industrial engineers
- EWE/IWE engineers
- Occupational safety engineers
- TIG welder performing highest quality welds
- Fitters
- Pipefitters (isometric personnel)
- Insulation workers
- Management and administrative personnel

## PRODUCTION

In 2017 Industrius d.o.o. has started his own production of process and energy equipment in the Podi Industrial Zone near Šibenik. Thanks to this hall Industrius d.o.o. can optimise the delivery time and perform even highly complex repair work. Industrius d.o.o. is specialized in cutting, bending and processing of metal as well as welding.

The hall is primarily intended for production of pressure vessels such as compressed air tanks, distributors and boilers of hot water, water steam and other media, liquid fuel tanks (single and double), pressure accumulators, tanks, closed and open expansion vessels, filter vessels ect. Production is also oriented on ship equipment, steel structures and pipelines.

### Machinery park:

- Plasma cutter
- Metal plate bender
- SAW beam welding machine
- Press brake
- Hydraulic scissors
- Radial drilling machine
- Milling machine
- Band saw
- Lathe machine
- Welding machines
- Forklift 5t
- Gantry crane 2 pcs 15t

## SERVICES

**Metal cutting** – Metal cutting is performed using CNC plasma cutter, which simultaneously cuts metal by means of gas.

Depending on the requirements of the projects cutting can be performed with hydraulic scissors and band saw.

**Metal processing** – Depending on the requirements of the projects and purposes of the metal, Industrius d.o.o. is offers a service of automatic and manual metal processing like bending, turning, welding and other material processing methods.

**Welding** – Welding is performed with Fronius welding machines (TIG and MAG) and with SAW beam welding machines.
